Definitions. Definitions in graph theory vary. The following are some of the more basic ways of defining graphs and related mathematical structures.. Graph. In one very common sense of the term, a graph is an ordered pair  $G = (V, E)$  comprising a set  $V$  of vertices, nodes or points together with a set  $E$  of edges, arcs or lines, which are 2-element subsets of  $V$  (i.e., an edge is associated with ...

A bar chart or bar graph is a chart or graph that presents categorical data with rectangular bars with heights or lengths proportional to the values that they represent. The bars can be plotted vertically or horizontally. A vertical bar chart is sometimes called a line graph.. A bar graph shows comparisons among discrete categories. One axis of the chart shows the specific categories being ...

Histogram and density plots. The qplot function is supposed make the same graphs as ggplot, but with a simpler syntax. However, in practice, it's often easier to just use ggplot because the options for qplot can be more confusing to use.

Title: Normalized Laplacian Spectrum of Some R-Coronas of Two Regular Graphs Vol.42(6) (2018) page: 833-844 Author(s): A. Das and P. Panigrahi Abstract: In this paper we determine the full normalized Laplacian spectrum of the R-vertex corona, R-edge corona, R-vertex neighborhood corona, and R-edge neighborhood corona of a connected regular graph with an arbitrary regular graph in terms of ...
