Labour economics seeks to understand the functioning and dynamics of the markets for wage labour.. Labour markets or job markets function through the interaction of workers and employers. Labour economics looks at the suppliers of labour services (workers) and the demanders of labour services (employers), and attempts to understand the resulting pattern of wages, employment, and income.

In economics, a free market is an idealized system in which the prices for goods and services are determined by the open market and by consumers. In a free market the laws and forces of supply and demand are free from any intervention by a government, by a price-setting monopoly, or by other authority. Proponents of the concept of free market contrast it with a regulated market, in which a ...
